

Percentage of 2015-16 Bachelor's Degree Earners with Previous Enrollments at Two-Year Public Institutions

The states in the map represent the states in which bachelor's degrees were awarded. In this analysis, baccalaureate-granting institutions that predominantly award associate degrees (at least 55 percent of the undergraduate degrees awarded are associate degrees) are classified as two-year institutions. As such, enrollments at these institutions count in the numerator, but bachelor's degrees awarded by them do not count in the denominator. Alaska and D.C. are labeled N/A on this map because the two-year public institutions in those two areas report data to the Clearinghouse under the same institutional profile as four-year public institutions.
